

# The Hopewell Centre

OUTREACH

“

*We really appreciate the Hospice Outreach staff coming out to see us in our own home. Their guidance, support and understanding is so valuable during this very stressful time in our lives.*

”

**Hopewell Hospice**  
Healthcare with Heart

We are a compassionate community that grows with each family we care for.

We have served both young and old for over 20 years and are on hand to support families caring for a loved one with a serious life-limiting illness.

Holistic Palliative Care is provided by coordinated medical, nursing, allied health, pastoral care and social services. Holistic Palliative Care integrates the physical, psychological, social, spiritual and cultural aspects of care. We believe in the right of each patient to make informed choices in their own time about the care they receive and the environment in which they receive that care.

We work alongside the nursing services available on the Gold Coast to help ease the pressure on carers ensuring that they are emotionally and socially supported. We know the difference this can make, we believe it can reduce the need for hospitalisation as a result of stress and the illness. Our comprehensive palliative care is provided for adults and our holistic care model supports their families and children as well.

To find out more about Hopewell Centre and its services, including Outreach, Living Well Day Respite or the hospice, please contact one of our friendly family support staff members to discuss your needs.
